In case of purchases in foreign currency, the transaction's value is deducted according to the foreign exchange rate on the transaction's settlement date, which is determined by the merchant or the acquirer bank, and not the execution date. Therefore, please ensure that there is sufficient balance in the account or card on the transaction's settlement date.

A note on the international spending limits for credit cards (purchases or retail transactions):

The foreign currency usage maximum limit within 30 days is the monthly international purchase limit set in the above table. Please note that the 30-day count will start with the first transaction in foreign currency on a rolling basis.

Example: If the monthly international purchase limit of the credit card is EGP 40,000 and you use the equivalent of EGP 20,000 in foreign currency on the first day of the month, EGP 15,000 on the 15th, and the equivalent of EGP 5,000 in foreign currency on the 20th day, then you will start the following month with a usage limit equivalent to EGP 20,000 in foreign currency, increasing to EGP 35,000 on the 15th day and EGP 40,000 on the 20th day.

Notes on international spending at specific merchant categories:

- International spending at certain merchant categories will be restricted or limited on credit and debit cards
- International purchase of jewelry is restricted
